„In the beginning it was just one thought“

The idea: to generate and design individuality in combination with performance. In a branch where is no space for mistakes to set up a product and a brand which has never been there before.

The purposes: from the beginning clearly defined! Exclusivity, precision and quality. Every vehicle is a hand crafted masterpiece with character.

Since the foundation in 1999, *speedART* has pursued a logical strategy of growth and progress. By a narrow collaboration with our developing partners from the most different technology regions in Germany and worldwide, the combination of traditional craftsmanship and the modern production procedure is also assured for the future.

Results? Our biggest success is if you express the enthusiasm for your car with a smile.

Everything that counts: perfect evolution! To go a step further without losing the aims out of sight. That is our task.

„You have to try the impossible, to reach the possible.“

Hermann Hesse

PS9

The design of the so called "PS9 - 650" (Panamera Speed with 650hp) was completely designed in CAD which guarantees a perfect quality and finish of the parts and also a harmonic look of the whole car.

The target was to create a sportive look without disturbing the proportions and to reduce and optimize the CW-values. Especially the rear has become more

sportive because of the new *speedART* lining. An improved downforce prepares this sportive limousine with the *speedART* powerkit for every operational area.

The concept of the two-tone painting is reflecting in the area of the rear diffuser, side skirts, rear wing and front chin spoiler and creates a whole new look of the car in the lower sections.

„Thinking and being are determined by the contradiction.“
Aristoteles

Many exterior carbon applications in black matt like the mirror housings, front fender air outlets, rear border trim and the air outlet of the engine hood have been installed.

Also components of real red carbon have been installed in the interior and engine area. Together with the red stitching, red safety belts, red instrument dials and the alloy pedal set, those parts generate a harmonic atmosphere of high class luxury and convincing sportiness.

The 365mm Airbag sport steering wheel with F1-shift paddles feels ergonomic and also provides a shifting procedure like in Formula 1.

„Who wants to interest, must provoke.“
Salvador Dali

PS9

In case of the power *speedART* has made as usual a balanced package between sportiness, agility, performance and daily driving usability.

The first test have shown good results and *speedART* will push the development further.

Powerkits from 520hp up to 650hp and 890Nm torque with modified turbochargers, sport-catalysts, sport-exhaust system with sound control and Design tailpipes are particularly available or in preparation. The acceleration of the 650hp version is 3.5s from 0-62 mph and has a V-max about 202 mph.

The sport-exhaust system has a modular design which allows to modify it step by step - just sound or additional power.

„The living of the imagination is no escape in the unreal, it is boldness and invention.“
Eugene Ionesco

47

PS9

To finish and finalize the outfit, the *speedART* wheel design „LSC-FORGED“ (Light-Spoke-Competition, forged) has been constructed in 22“.

Of course *speedART* has designed the wheels with the USP of a 23“ center star and the spokes also are going over the outer rim which gives that design a fantastic wide look.

„The talents are often not so unequal, assiduity and character are making the difference.“

Theodor Fontane

Suspension

Optimum transmission, high cornering speed, controllable at the limits and a safe driveability.

Sportive or comfortable! We do the setup like you wish. Modern suspensions with active controlled systems are offering still an optimizing of driveability because the most series suspensions are a compromise of sportive and comfort. We can offer you various opportunities

from comfortable suspension to complete adjustable coilover systems.

A brilliant cooperation between our development partner and test drivers is setting us in the lucky position to go on moving the limits of driving physics in your favor.

„Faith to those who search the truth and doubt those who already have found.“
Andre Gide

Brakes

From 62 to 0 mph faster than from 0 to 62 mph.

To secure safety by power improved vehicles, it is necessary to adapt the brakes the engine power. Like the suspension, the brakes also can be improved in different ways.

Sport brake systems up to race brake systems made of ceramic component

material. We can offer different opportunities and the right setup for your requirements. To get an maximum in brake performance all components like suspension, wheels and tires have to be attuned well. Different motorsport and hightech materials are taking place in here.

Together with our technology and developing partner we are trying to improve

the different systems and technics in security, reliability, performance and driving pleasure.

„Who says A must not say B. He can also recognise that A was wrong.“
Bertolt Brecht

Wheels

Form follows function or reversed, just how you wish. Give your car an individual taste.

No matter if one piece forged or modular. Between different variants and types can be chosen.

Also we can offer individual paint jobs or powder coatings of wheel center, wheel lip and wheel bed in various colors. For

sportive and race driving we have weight reduced wheels in our product range.

Another enhancement in value you can reach with our harmonic wheel designs. Strong contours or smooth curves are creating a special and personal appearance of your car and highlight the claims of sportive elegance.

„The normality is a paved street, you can go well on it, however, there grow no flowers on her.“
Vincent van Gogh

Engine

Power increase based on the newest standards of technics and on top of the happening.

Power in every situation, is brought to the PS9-650.

All components like gearbox, clutch and engine are so attuned that at every time the maximum power is available. In co-operation with aerodynamic, suspensi-

on, wheels, tires and brakes it creates an amazing value of driving dynamic.

„The whole thing is more than the sum of its parts.“
Aristoteles

Interior

Fabric, leather and microfiber and also carbon, stainless steel, aluminium and wood. In combination with entertainment and multimedia. Various forms and colors in any thinkable version.

Also here the best materials are used and technology on the newest state of the things. No matter whether tone in tone, Bi-color or a mix from the respective materials, in creating the interior the-

re are nearly no borders placed. In the course of the years all this only became possible by an intensive collaboration with the most different companies who have specialized themselves in individualizing interiors.

Here it is exclusively pure manual labour and the standards in quality and processing are exceptionally high. Please notice that a listing of all products and

variations in the interior is in this prospect not possible because of the large amount of opportunities.

Please send us your enquiry direct to info@speedART.de. We will send you as soon as possible our response and a detailed offer.

„Temptations you should give in. Who knows if they come back!“
Oscar Wilde
