SP81-CR

The *speedART* SP81-CR based on Porsche 981 Cayman/S, is like his ancestor Porsche 986 and 987 a combination of a vehicle suited for everyday driving and sportscar for the race track which unites agility and driving dynamic as well as aesthetics and functionality with each other. All this together makes the SP81-CR to an unmistakeable experience of a quite special kind.

The *speedART* SP81-CR do not originate simply somewhere, they become true in exactly the same region where also the headquarter of the company PORSCHE lies.

The only 15 minutes distant swabian Rutesheim is the place where the vehicles in craft master work are getting improved. This new headquarter of *speedART* since the end of 2007 is the result of the logical conversion of strategy and

growth. On about 2700m² originates here one of the most exciting sportscars in the world.

The SP81-CR: Carpe Viam!

„Thinking and being are determined by the contradiction.“
Aristoteles

Suspension

Optimum transmission, high cornering speed, controllable at the limits and a safe driveability.

Sportive or comfortable! We do the setup like you wish. Modern suspensions with active controlled systems are offering still an optimizing of driveability because the most series suspensions are a compromise of sportive and comfort. We can offer you various opportunities

from comfortable suspension to complete adjustable coilover systems.

A brilliant cooperation between our development partner and test drivers is setting us in the lucky position to go on moving the limits of driving physics in your favor.

„Faith to those who search the truth and doubt those who already have found.“
Andre Gide

Brakes

From 62 to 0 mph faster than from 0 to 62 mph.

To secure safety by power improved vehicles, it is necessary to adapt the brakes the engine power. Like the suspension, the brakes also can be improved in different ways.

Sport brake systems up to race brake systems made of ceramic component

material. We can offer different opportunities and the right setup for your requirements. To get an maximum in brake performance all components like suspension, wheels and tires have to be attuned well. Different motorsport and hightech materials are taking place in here.

Together with our technology and developing partner we are trying to improve

the different systems and technics in security, reliability, performance and driving pleasure.

*„Who says A must not say B. He can also recognise that A was wrong.“
Bertolt Brecht*

Wheels

Form follows function or reversed, just how you wish. Give your car an individual taste.

No matter if one piece forged or modular. Between different variants and types can be chosen.

Also we can offer individual paint jobs or powder coatings of wheel center, wheel lip and wheel bed in various colors. For

sportive and race driving we have weight reduced wheels in our product range.

Another enhancement in value you can reach with our harmonic wheel designs. Strong contours or smooth curves are creating a special and personal appearance of your car and highlight the claims of sportive elegance.

*„The normality is a paved street, you can go well on it, however, there grow no flowers on her.“
Vincent van Gogh*

Power

Power increase based on the newest technical standards and at the level of the happening.

All components like gearbox, clutch and engine are so attuned that at every time the maximum power is available. In co-operation with aerodynamic, suspension, wheels, tires and brakes it creates an amazing value of driving dynamic. Every SP81-R is unique and has his own

unmistakeable and individual character.

It takes years of know how and experience to understand the automobile details and their respective characters. The own interpretation is the next difficult but important step to get closer to the perfect automobile. We definitely succeeded at the SP81-R.

„The whole thing is more than the sum of its parts.“
Aristoteless

Interior

Fabric, leather and microfiber and also carbon, stainless steel, aluminium and wood. In combination with entertainment and multimedia. Various forms and colors in any thinkable version.

Also here the best materials are used and technology on the newest state of the things. No matter whether tone in tone, Bi-color or a mix from the respective materials, in creating the interior the-

re are nearly no borders placed. In the course of the years all this only became possible by an intensive collaboration with the most different companies who have specialized themselves in individualizing interiors.

Here it is exclusively pure manual labour and the standards in quality and processing are exceptionally high. Please notice that a listing of all products and

variations in the interior is in this prospect not possible because of the large amount of opportunities.

Please send us your enquiry direct to info@speedART.de. We will send you as soon as possible our response and a detailed offer.

„Temptations you should give in. Who knows if they come back!“
Oscar Wilde
